TODAY is the day to save lives and end breast cancer forever. Will you be the one to lead the way? You can begin by taking the **125 CHALLENGE**

The average cost of a life saving mammogram is \$125. Early detection is one of the keys to surviving breast cancer. By getting mammograms, women can detect breast cancer, hopefully at its earliest stages. YOU can save a life by taking the 125 CHALLENGE. Your \$125 will make an impact on a life. The time is **NOW** to save our mothers, daughters, sisters, and friends.

Saving lives...ending breast cancer forever

Up to 75 percent of the funds you donate remain here in San Diego County to cover every step of the breast health journey – from education, outreach, mammograms and diagnostics, to surgeries, chemotherapy, radiation and material and financial support like meals, mortgage payments, support for children, prosthetics and wigs. The remaining 25 percent of each dollar donated funds national research to discover the causes of breast cancer, and ultimately, its cures. In fact, next to the U.S. Government, Susan G. Komen for the Cure is the largest funder of breast cancer research in the world.
